

Peel & Stick

Studying, Memorizing & Applying God's Word to Daily Life

Presented by Michelle Bowen, Director of Education and Events for Multiply Ministries - MultiplyMinistries.org -

God's Word is always true and transcends time.

God's Word is true for all people in all places.

The power of God's Word makes us holy for Him.

God's Word equips us. It is our source for discipleship.

Our brains receive information through sensory input: sight, sound, touch, movement, taste, and smell.

These connections strengthen with repeated exposure, making the memory more likely to be retained.

When we want to recall a memory, the brain activates the same neural pathways that were involved in its storage.

Visual Learning

Kinesthetic Learning

Abstract Connections

Meditation

Auditory Learning

Application
